## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because it contains a reference to figure 2 at the bottom (one page Abstract of March 29, 2006). Correction is required. See MPEP § 608.01(b).
2. The disclosure is objected to because of the following informalities: In the amendment filed March 29, 2006 to the Cross Reference section there are non-initialed and dated alterations. It appears the EP was hand written over therein. Additionally on page 3, claim 1 is referred to. Since claim numbers are subject to change during prosecution this reference to claims should be removed and be written out in text form. Appropriate correction is required.
3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.

- (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 19627106 in view of Bruck et al (5959264).

DE '106, discussed on pages 1-3 of the specification, teaches a floor covering as recited except that the channels, of the sound absorbing blow molded part, are open towards the top of the blow molded part.

Bruck et al (which corresponds to EP 0775354) discussed on pages 4 and 5 of the specification, teaches that the sound absorbing plate instantly recited is a known sound absorbing plate and instantly used as the blow molded part of the instant invention.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to DE '106 to substitute one known blow molded sound insulating plate for another motivated by the fact Bruck et al discloses this plate used for the same purpose (i.e. sound adsorbing properties).

#### ***Information Disclosure Statement***

7. The information disclosure statement filed July 10, 2006 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because it does not contain a PTOL-1449 to consider. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).
